To: Commissioner for Patents
P.O. BOX 1450

Subject: Information disclosure statement under 37
CFR §1.56

20

Dear Sir or Madam:

This is an Information Disclosure Statement in
accordance with the duty to disclose information
25 material to patentability under 37 CFR §1.56. The
applicants wish to make of record the document(s)
listed on the accompanying form PTO/SB/08.

Since this IDS is filed before the mailing date of a first
30 office action on the merits, consideration of the information
disclosure statement is hereby requested according to 37 CFR
§1.97(b). The prior art contained in the information

disclosure statement was cited from the Taiwan Intellectual Property Office, on Feb 16, 2006 for a counterpart Taiwanese patent application (#TW 092116311). Applicant sincerely hopes that the examiner can consider the item contained in
5 the information disclosure statement.

According to the requirement set forth in 37 CFR §1.98 and MPEP 609, applicant is submitting a copy of item contained in the IDS: Taiwanese Publication #TW
10 527567 (published on April 11, 2003).

A translation of the abstract of the Taiwanese publication #TW 527567 is as follows: A microprocessor capable of real-time tracing for executing a program
15 of a program segment is disclosed. The microprocessor includes a micro-processing controller for decoding and executing a plurality of commands; a program count generator coupled to the micro-processing control unit for generating a non-sequence program count value when
20 the micro-processing controller executes to a non-sequence command; a tracing buffer coupled to the program count generator, the tracing buffer is capable of storing a plurality of tracing records, each tracing record includes the non-sequence program count value
25 and a status bit; and a tracing buffer controller coupled to the micro-processing controller and the tracing buffer for storing the non-sequence program count value into the status bit as an empty status in one of the tracing records, and the status bit of the
30 tracing record stored is set as a fill status, and when each status bit of the tracing record stored is set to be the fill status, the microprocessor enters into

a circuit mode so as to store the non-sequence count value into a storage device.

5 Respectfully submitted,

Winston Hsu
